## Foreword

---

Dear colleagues,

Shortly before the summer holidays (at least in Lower Saxony) we send you the current newsletter with lots of exciting information. As always, we would like to thank you for your numerous contributions, which make our work a bit better and we are very happy about the colorful mixture of all directions.

Warm greetings from Osnabrück send you

Peter and Sabine

### New Private Approval-Compliant Degree Program Psychology at FHM

Jan has sent us the following information:

The private Fachhochschule des Mittelstands (FHM) has been offering the Bachelor's degree programme 'Psychology' at its sites in Bielefeld, Bamberg and Hanover for 2 years – in addition to the well-known 'Psychology' degree programme: <https://www.fh-mittelstand.de/studies/psychology-clinical/full-time/>. Special feature: The study programme 'Psychology' takes place in cooperation with the British University of Gloucestershire and entitles students to take up a further master's programme with the aim of obtaining approval in psychotherapy at a German university (according to PsychThG and PsychThApprO). The total cost of the studies is approximately EUR 32,000. The prerequisite is the general university entrance qualification (FHR is not sufficient) as well as English

skills of at least B2, which can be proven by the HZB. Approximately 20% of the studies are taught in English, in total students have to study in the UK for about 2 weeks – the rest of the studies take place at the above locations (2 days/week presence, 2 days/week online, 1 day free).

## Humanities and no end 😊

Mark has sent us two publications by his colleague Marina on the topics of humanities at work and 'emptiness instead of teaching' about educators who do not attend the teaching profession, which you will find attached.

## Information about climate professions (studies and trainings)

Silke has made us aware of two interesting websites on the subject of climate professions: [Study offers](#) from Baden-Württemberg on climate protection and sustainable development.

Central Association of German Crafts one page with all [climate professions](#). There are also craftsman stories to be found.

## Opportunity Calculator for the BaPsy DGPs

Sabine has found an online tool that helps applicants assess how good they need to be at BaPsy to get a place in psychology. The offer is private (i.e. not like the offer for medicine), so it is unclear how accurate the [opportunity calculator](#) works.

## Online event with Prof. Dr. Frank Ziegele from the CHE "University landscape in transition"

For all those who could not participate in the online event, Sabine shared the slides and the comments from the chat in the attachment for all interested parties.

## Medical studies in the Netherlands

Désirée has researched that as of WS 2026/27, medical studies in Maastricht will no longer be offered in English. Read [here](#).

## MEDICAL STUDY IN EUROPE

Sabine informs about a brochure of the CHE on the topic [MEDICAL INSTITUTE IN EUROPE - OFFERS AND ACCESS CONDITIONS](#).

---

## Regionally

---

### Niedersachsen

#### Lists of schools for health professions

Ines has found two lists of schools for health professions in Lower Saxony on the website of the MK.

Since these are downloads, it is best to find them via the search function: 'MK\_Ref42'. The lists are as of November 2024.

### Mecklenburg-Vorpommern

Anne has found two admission-free offers from MV for the highly sought-after degree programs in the field of business psychology, which she shares with us: [HS Wismar](#) and [HS Stralsund](#).

---

## To look beyond

---

### Interesting scenarios on how AI could (possibly) revolutionize the world of work

Annette has found a study by the Institute of Innovation and Technology that examines the possible development of generative artificial intelligence (GKI) and its impact on the labour market and employment by 2030. You can find them in the appendix.

## Trend study "Youth in Germany 2025"

Angela sent us this interesting study on "Between disappointment and confidence – Trend study Youth in Germany 2025". You can find it [here](#).

---

## New Study programmes

---

### Degree program Mechanical Engineering at the University of Applied Sciences Dresden HTW DD

Steffen reports on the reorientation of the mechanical engineering degree program of the Dresden University of Applied Sciences, which is profiled in the direction of climate protection, renewable energies and mobility and also offers additional training-integrating degree programs. A detailed description of the program can be found in the appendix.
